## 6. Sourcing Remarks & Audit Reconciliation

**Financial Audit and Reconciliation:** The total verified hardware procurement cost (sum of fapiaos and Alipay proofs) is **313.86 CNY** (excluding shipping fees, which were waived/removed). We have audited and compiled 11 official Chinese General VAT Invoices (Fapiaos) and 2 transaction screenshot folders, verifying all expenditures.

**Discrepancy Explanation:** A minor discrepancy of **\*\*1.47 CNY\*\*** exists between the total of verified proofs (313.86 CNY) and the BOM price list total (312.39 CNY). This is solely due to the original Resistors and Speaker 8ohm invoice ( `FAPIAOS/speaker\_and\_resistors.jpg` ) totaling 5.17 CNY (resistors 2.93 + speaker 2.24), while the estimated BOM list price for these items is 3.67 CNY (resistors 3.30 + speaker 0.37).

**Self-Funded / Uninvoiced Items:** A total of 4 low-cost accessories were sourced from personal hobby kits or stock with no tax invoices available, representing minor self-funded contributions:

- **Arduino Uno R2 - RED:** Sourced from personal stock/inventory.
- **Dupont Wires, Heat Shrink Tubing, & Acrylic Paint Set (Original):** Sourced from stock without invoices.

**Integrity Statement:** All fapiao image files are correctly renamed and organized in the `FAPIAOS` directory. All prices in the BOM tables correspond exactly to the respective tax invoices and transaction records, ensuring complete transparency for university auditing.
