

GenAI Oral Presentation Script

PROJECT: URBAN GLOW GRID · DURATION: 5 MINUTES · TEAM 22

ABIR - [SLIDE 1: TITLE]

0:00 - 0:45

(Wait for the slide to load, address the jury with energy)

"Hello everyone. Today, we are presenting how generative AI has transformed our project, **Urban Glow Grid**. More than just a tool, AI has been a true **innovation partner** for us, allowing us to push the boundaries of rapid prototyping."

ABIR - [SLIDE 2: COLLABORATIVE PARTNER]

0:45 - 1:30

"Our approach is built on human-machine synergy. AI didn't just draft text; it served as a **technical scaffold**. We increased our prototyping speed by 5x on the digital layer, while maintaining a **permanent human filter** to ensure the physical feasibility of our ideas."

SOFIANE - [SLIDE 3: LYRA METHODOLOGY]

1:30 - 2:15

(Point to the 4-D steps on the slide)

"To structure this collaboration, we developed the **Lyra** framework. It's a 4-step methodology—Deconstruct, Diagnose, Develop, Deliver—that allows us to extract high-precision results from AI."

"By assigning it the role of 'Technical Systems Director,' we transformed vague prompts into actionable blueprints."

SOFIANE - [SLIDE 4: DIGITAL & SLIDE 5: PHYSICAL]

2:15 - 3:15

"Concretely, for the **digital** part, AI generated the 'breathing' logic for the LEDs, using CSS variables for an organic feel. However, for the **physical** part, we had to correct its suggestions. It proposed a 1:10,000 scale, impossible for our 80cm board. We manually converged to 1:15,000, illustrating our role as a critical 'safeguard'."

MOHAMED - [SLIDE 6: DIVERGE & CONVERGE]

(Refer to the 'GLOW' winner)

"In creative development, AI was our brainstorming engine. After generating 10 different game mechanics—the **Divergence** phase—we converged on the **Glow Intensity** mechanic."

"This choice was deliberate: it relies on cognitive psychology by focusing on **positive reinforcement**. The city lights up when the user saves energy, making sustainability visually rewarding."

ABIR - [SLIDE 7: HUMAN FILTER & SLIDE 8: Q&A]

"In conclusion, AI gives us **speed**, but we provide the **direction**. Urban Glow Grid is the result of a balance between algorithmic innovation and human curation."

"Thank you for your attention, we are now open for your questions."
