

◆ PITCH DECK

Urban Glow Grid

Mastering Energy Through Tangible Play.

1. The Problem

ENERGY BLINDNESS

Invisible

We consume blindly.

Strain

Waste overloads grids.

Blackouts

The ultimate risk.

2. The Solution

TANGIBLE UI

1:15,000 Scale Model

6 Iconic Paris Zones

Real-Time Interaction

LED Visual Feedback

Gamified Engineering

3. Why Play?

THE VALUE PROPOSITION

Tangible Learning

Make data physical.

Active Engagement

Replace boring apps.

Empowered Citizens

Prevent blackouts.

4. Gameplay

HOW IT WORKS

1

Initialize

3 Minutes Limit

2

Connect

Turn Potentiometers

3

Balance

Monitor OLED

4

Prevent

Fix Red Zones

OLED Visualizer

[-- | ===== | --]

5. The Market

TARGET AUDIENCE

B2B EdTech

Schools & Universities

B2G Smart Cities

Municipalities & Museums

6. Financial Story

HIGH MARGIN

BILL OF MATERIALS

Component	Qty
Arduino Mega	1
WS2812B LEDs	8
Potentiometers	6
Push Buttons	4
OLED Display	1
Mini Speakers	2
Wood, Glue, 3D Print	-
Total Cost: < 200 RMB	

Low Hardware Cost
Premium IP Value

7. Scalability

MASS PRODUCTION

Breadboard → PCB

Cuts assembly time by 95%.

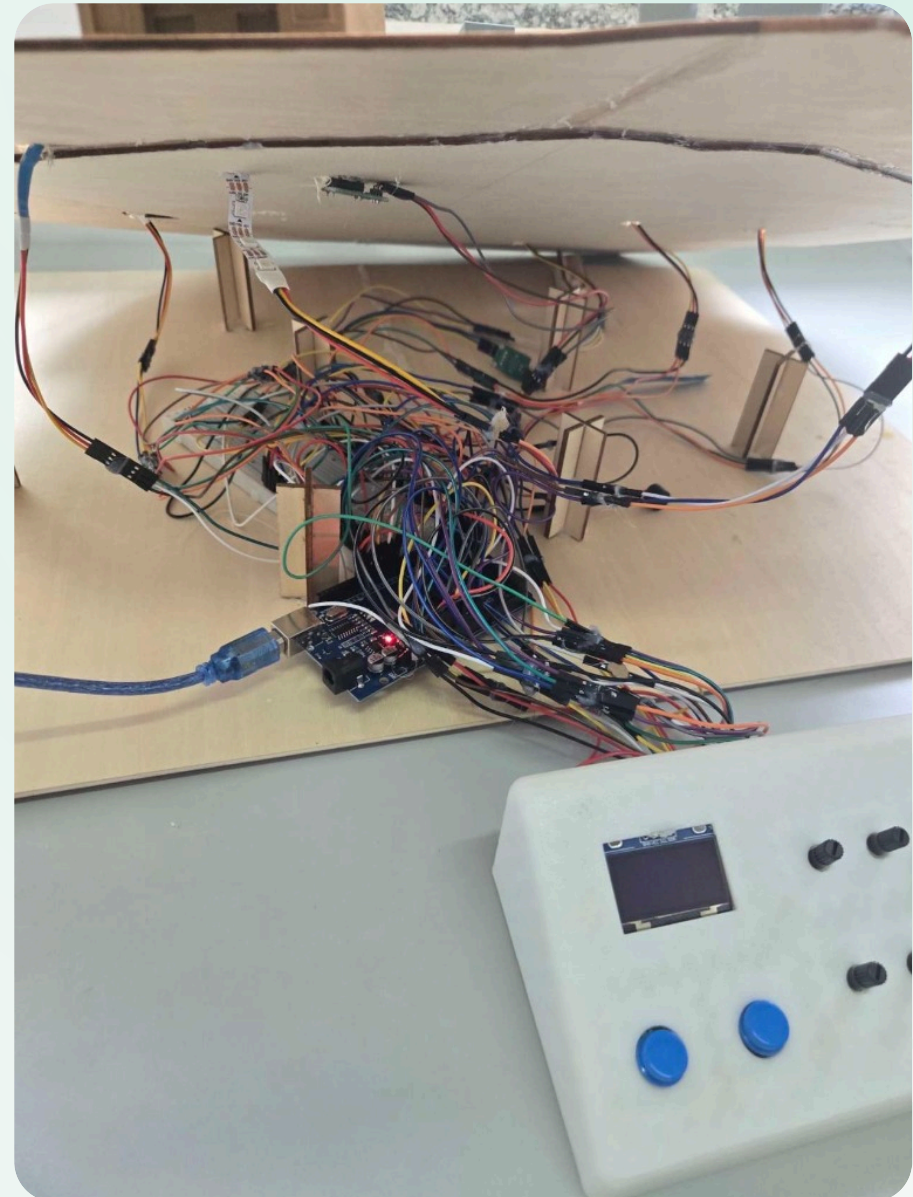

Modular Design

From Desk Kits to Museums.

8. Challenges

ENGINEERING REALITY

- **90+ Cables**
Extreme density constraint
- **Loose Connections**
Jumper wire instability
- **Power Balance**
LEDs + Audio current limit

9. Why Us?

TEAM 22 (VISION & ENGINEERING)

Abir ISLAM

CEO / PROJECT
LEAD

**Sofiane
LACHHAB**

CTO /
ARCHITECTURE

**Mohamed
MELLOUK**

CREATIVE DIRECTOR

**Ismail
MABROUKI**

HARDWARE
SUPPORT

Master Energy.

THANK YOU
